Contents Volume 66

Vol. 66, No. 1

Demand uncertainty and returns policies for a seasonal product: An alternative model
A.H.-L. Lau, H.-S. Lau and K.D. Willett 1
Parametric analysis of setup cost in the economic lot-sizing model without speculative motives
C.P.M. Van Hoesel and A.P.M. Wagelmans 13
Process improvement for a container-filling process with random shifts
W.W. Williams, K. Tang and L. Gong 23
The integration of activity based costing and enterprise modeling for reengineering purposes
I.P. Tatsiopoulos and N. Panayiotou 33
Justification of manufacturing technologies using fuzzy benefit/cost ratio analysis
C. Kahraman, E. Tolga and Z. Ulukan 45
Solvable cases of permutation flowshop scheduling with dominating machines
S. Xiang, G. Tang and T.C.E. Cheng 53
Optimal payment time for a retailer under permitted delay of payment by the wholesaler
A.M.M. Jamal, B.R. Sarker and S. Wang 61
A negotiation aid for fixed-quantity contracts with stochastic demand and production
T.A. Grossman Jr., T.R. Rohleder and E.A. Silver 69
Market-driven product and service design: Bridging the gap between customer needs, quality management, and customer satisfaction
A. Herrmann, F. Huber and C. Braunstein 79
Diary of Events 99

Vol. 66, No. 2

Estimating the cost for doing a cost estimate
D.S. Remer and H.R. Buchanan 101
Convergence and productive efficiency in fourteen OECD countries: A non-parametric frontier approach
F.J. Arcelus and P. Arocena 105
A cone-ratio DEA approach for AMT justification
S. Talluri and K.P. Yoon 119
Evaluation of the potential benefits of lot streaming in flow-shop systems
A.A. Kalir and S.C. Sarin 131
Quality certification and performance of Brazilian firms: An empirical study
M.A.M. Lima, M. Resende and L. Hasenclever 143
On optimal two-stage lot sizing and inventory batching policies
R.M. Hill 149
Lot sizing and scheduling with sequence-dependent setup costs and times and efficient rescheduling opportunities
K. Haase and A. Kimms 159
Using hierarchical pseudo bills of material for customer order acceptance and optimal material replenishment in assemble to order manufacturing of non-modular products
J.W.M. Bertrand, M. Zuijderwijk and H.M.H. Hegge 171

0925-5273/00/$ - see front matter © 2000 Elsevier Science B.V. All rights reserved.

Optimising product recycling chains by control theory
U. Kleineidam, A.J.D. Lambert, J. Blansjaar, J.J. Kok and R.J.J. van Heijningen 185
Diary of Events 197

Vol. 66, No. 3

Lot streaming in multistage production systems
R.V. Ramasesh, H. Fu, D.K.H. Fong and J.C. Hayya 199
Robust multi-item newsboy models with a budget constraint
G.L. Vairaktarakis 213
Planning and managing manufacturing capacity when demand is subject to diffusion effects
M. Cantamessa and C. Valentini 227
Self-assessment using the business excellence model: A study of practice and process
L. Ritchie and B.G. Dale 241
Traditional and innovative paths towards time-based competition
A. De Toni and A. Meneghetti 255
A multi-agent approach for the capacity allocation problem
A. Brandolese, A. Brun and A. Portioli-Staudacher 269
A note on 'An efficient algorithm for the single-machine tardiness problem'
D. Biskup and W. Piewitt 287
Diary of Events 293
